Territorial claims in the North – an open dispute

Relations to its neighbors in the North-West mesmerizes the relationship of India to the rest of the world!

The Economist (March 39th-April 5th 2013) has a special note: **Missing Map?** Sadly, India censors maps that show the current effective border, insisting instead that only its full territorial claims be shown. It is more intolerant on this issue than either China or Pakistan. Indian readers therefore probably be deprived of the map ...
